

Pregnancy outcome

Congratulations!

Our part in your treatment is not completed until we know the pregnancy outcome.

We have an obligation to monitor all pregnancies which are a result of treatments from our clinic. We report the data to the National Board of Health.

The purpose of collecting data is to verify that the methods used are safe and of good quality.

We would appreciate if you could give Livio Reykjavík consent to access data from your medical records to obtain information about the outcome e.g. date of birth, mode of delivery, gender, length and weight (please see the consent form).

We would of course be very happy if you contact us after the delivery and provide us with this data. It matters a lot for us!

Pregnancy outcome

After the delivery, we would like you to provide the following information by post or e-mail barn@livio.is.

Name

Date of birth

Name of spouse (if applicable)

Date of birth (if applicable)
